

KS3 Half Term 1: Number and Place Value Revision

Using and Applying	What is the Highest Common Factor and Lowest Common Multiple for 24 and 32? 1	For each of the following questions, use the symbols $<$, $>$ or $=$ to make the number sentences true. 2 $48 \div 6$ 12×4 34×2 $136 \div 2$ $46 + 39$ $101 - 33$	Order the following numbers in ascending order: 3 0.58 5.8 58 0.85 0.508 0.805
Reasoning	If you were rounding to the nearest whole number, what is the least monetary value which would round to £10? 1	$\begin{array}{r} 6.2 \times 4.8 \\ \hline 2.4 \end{array}$ 2 Show how an estimation to this calculation is 15.	Why is 2 a prime number but other even numbers aren't? 3
Problem Solving	5 6 8 2 1 0 1 Choosing from the digits above and using each digit only once, fill in the gaps in the equation below to give a result between 200 and 300. _____ $\times$ _____ =	When a number is rounded to the nearest 100, it gives 200. When the same number is rounded to the nearest 10, it gives 250. The number is a whole number. Write down a possible value for what the number could be. 2	Using the following digit cards, create the smallest even negative number. You may only use each card once and all cards must be used. 3 5 0 9 2 1 -

KS3 Half Term 1: Number and Place Value Revision Answers

Using and Applying	HCF = 8 LCM = 96 1	$48 \div 6$ < 12×4 34×2 = $136 \div 2$ $46 + 39$ > $101 - 33$ 2	0.508, 0.58, 0.805, 0.85, 5.8, 58 3
Reasoning	£9.50 1	$(6 \times 5) \div 2 = 15$ 2	Possible answers may include: - A prime number has only two factors – 1 and itself; - Even numbers are always divisible by 2. When 2 is divided by 2, the answer is 1. 3
Problem Solving	Answers may vary, for example: $25 \times 10 = 250$ 1	Possible answers are 245, 246, 247, 248 or 249. 2	- 9 5 2 1 0 3
